

## Free eMagazines with Warwickshire Library Service

With monthly photography magazines costing £5-6 each and weekly magazines costing ~£3, it's easy to clock up a bill of several hundred pounds a year. Add in a selection of other magazines and it soon gets into the territory of a new lens or camera body.

However, if you have a Warwickshire library card you can get access to a number of eMagazines for free.

Follow this link for details:- <http://www.warwickshire.gov.uk/ebooks>

The service is provided by Zinio ( a subscription based service) which provides a limited selection of magazines for Warwickshire library members for free. At the moment Amateur Photographer, Digital Camera World and Digital SLR Photography are all available. There are also a selection of Sport, Fishing, Cooking, PC/Mac, Current Affairs, Fitness and even Steam Trains, amongst others! All you need is your library card (and library number) and a Zinio account which you can create when you download your first eMagazine. There is even a Help Line if you have trouble setting it up.

Warwickshire Libraries also offers an eBooks, eAudio and eNewspaper service from different service providers.

Having saved money on magazines, you can then use it for your next photography purchase! To find the best price there is a photography equipment price comparison website.

This is the weblink:-

<http://www.camerapricebuster.co.uk/>

The site is run by a professional photographer and allows you to find the best UK price for photography equipment from a wide range of suppliers.

If you register with them, you can setup Watchlists of specific items you want to track the price of. When you login these items will be shown, with the best price, any price movement and seller's website. It will also provide the Current Price, Best Ever Price and Best Price for the last 90 days. Even if you don't purchase from the "cheapest" seller, you can use the price in your negotiations at your chosen supplier.
